PROJECTS

Heart Disease Prediction System

Python, Flask, CNN

- Built and trained a CNN model on a medical dataset, achieving 92% prediction accuracy.
- Performed data preprocessing and feature engineering to improve model reliability.
- Developed a real-time Flask web interface allowing users to submit inputs and receive live predictions.
- Deployed the model in an inference-ready pipeline with basic result visualization.

To-Do List Application

Python

- Designed a task-management app supporting add, update, delete, and complete operations.
- Structured the codebase using core Python logic to help users track daily tasks efficiently.

EXPERIENCE

Python Intern — Slash Mark

2 Months

- Built Python-based mini-projects, strengthening debugging and coding fundamentals.
- Collaborated on developing a To-Do List application from concept to completion.
